

Questions about Angels

Question: Do Angelic contacts just happen? I have been hearing soft whispers of my guardian Angels. They are softer than leaves rustling. While I meditate they are there & set things right for me & my family. How do I stay tuned always???

Answer: Yes, angels do contact people, especially during meditation. How to stay tuned always?? I find that when they want to get your attention they will. And during your meditations, you can call on them. Enjoy this wonderful communication.

Question: How do I find out what my guardian angel's name is? I'm 10 years old.

Answer: Thank you for your question. One of the ways that I tell people how to find out what their guardian angels name is to sit quietly and just see if any name comes to mind. Also pay attention to things that are happening in your life. Do you read something and does a name in the story feel special to you or do you hear a song and there is a name of a person in the song and that name feels special to you. The most important thing to know is that it is really not important to know the name of your guardian angel. She or he is there for you and will respond to your prayers. Continue to ask for his or her help. Angels are there for you even if you do not know their names.
